

20 March 2026

**Price increase notification**

Dear Valued Customer

The global supply environment for PVC and PE resin has deteriorated considerably and is changing daily. Escalating raw material costs, supply uncertainty and logistics pressures is impacting Pipemakers Australia and other manufacturers worldwide. This situation was communicated to our customers in a letter dated 11 March 2026.

As a result, Pipemakers Australia advises of the following changes in pricing, effective 13 April 2026:

- |                                 |                    |
|---------------------------------|--------------------|
| • PVC Pipe                      | Up to 30% increase |
| • Plumbing Fittings             | Up to 35% increase |
| • Electrical Bends and Fittings | Up to 40% increase |
| • HDPE Pipe                     | Up to 40% increase |

In the next few days, Pipemakers Australia will issue you with a new price file to reflect this change.

There is significant risk that further impacts on the availability of feedstocks to produce polymers will continue to put upward pressure on the price of our raw materials, leading to further increases on the sell price of our products.

We remain committed to supporting your business and ensuring continuity of supply during this challenging period. Our sales team will be in contact to assist with forward planning and to answer any questions you may have.

Yours sincerely,

**Joe Evenwel**  
General Manager – Northern Region  
Pipemakers Australia Pty Ltd
